1. Introduction

This Presenter's Manual is to be used for ACCP Term II curriculum. The syllabus aims at introducing students to XML basics, Java programming, C# programming, and MongoDB.

The student will learn the following modules in this course:

- Data Processing with XML and JSON
- Java Programming-I
- Java Programming-II
- Project-Java Application Development
- Programming in C#
- Emerging Job Areas (SMAC)
- Managing Large DataSets with MongoDB

After the completion of this course, students will be able to:

- Use XML and JSON to store and exchange data
- Design and develop desktop applications using Java
- Use the core language features and Application Programming Interfaces of Java to design object oriented applications
- Develop basic and advanced object oriented applications using C#
- Identify emerging technologies of the cloud and learn about SMAC
- Understand MongoDB concepts, features, architecture and data model, and learn to install, configure, and monitor open source NoSQL databases

The Project in this term will involve developing an application using Java technologies.

2. General Information on Session Schedule

The table below shows the details of the modules, the number of hours being spent on each module along with a break-up of the hours being spent on each module.

A session is of two hours duration.

Refer to the respective module presenter's manuals to understand further details of each session.

Module Wise Session Allocation

Module	Theory Hours	Online Hours	Total Hours	Self-Study Hours	Skill Code
Data Processing with XML and JSON	0	12	12	8	17

OnlineVarsity Deliverables

Onlinevarsity is a digital content access and collaboration platform for Aptech students. The numerous interesting features of the platform will enhance learning experience of the students.

(Faculties can access eBooks and other components in Onlinevarsity through Aprack.)

Resources available on OnlineVarsity (as applicable):

Icons	Feature - Description/Functionality
	Download Book - Student has the option to download the subject related e-book and read offline.
	Glossary - Student can access a list of subject related specialized words with their definitions.
	FAQ - Student can access frequently asked questions and their answers.
	Practice 4 Me - Student can test and evaluate their understanding of module related topics.
	Work Assignments - Student can solve scenario based lab assignments (Hands-on). The faculty will evaluate and give their feedbacks.
	References - Student can access additional subject related material for reading.
	Feedback - Student can provide feedback on the course material.
	Ask to Learn – Student can submit subject related technical queries. Queries submitted will be directed to the particular course coordinator/head.

4. Evaluation Strategy

The Evaluation Strategy for this course is as follows:

- Modular Examination (Objective)
- Practical Examination
- Project

4.1 Award of Grades

Overall Weighted Marks > = 40% but < 60% qualifies for **PASS**

Overall Weighted Marks > = 60% but < 75% qualifies for **CREDIT** and

Overall Weighted Marks > = 75% qualifies for **DISTINCTION**

Note: To attain a PASS/CREDIT/DISTINCTION grade, a student should achieve at least 40% in each of the elements of the Examination, otherwise he/she will be declared as 'Referred'.

4.2 Modular Examination

Below is the list of modules to be covered in the exams along with their weightages:

Modular Exam (E1)
